

PATIENT MASTERY PROGRAM

All phases of the Patient Mastery Program are two days in duration, with the first day usually dedicated to patient treatment and documentation. The second day will usually be dedicated to the review of treatment at the UB Esthetic Dentistry Education Center, review of treatment rendered in your office and discussion of treatment that will need to be accomplished at the next phase, or in your office between phases.

During Phase I, you will present your fully documented cases for review and discussion. The patient that will be treated at the UB Esthetic Dentistry Education Center must be available for examination on the first day. Also during Phase I, treatment will be finalized for both patients and sequencing of treatment is developed. You will be mentored with respect to interim treatment or preparation needs to be accomplished before the next Phase. Treatment is monitored throughout the program through documentation and evaluation by the faculty.

Phases at-a-glance...

Phase I Introduction and Treatment Planning

Day 1

8:30-9:00	Introduction Course objectives, requirements, outline and policy
9:00-12:00	Case Discussion (<i>two per candidate</i>)
12:00-1:00	Lunch
1:00-2:00	Case discussion
2:00-4:00	<u>Patient Examination</u>

Day 2

8:00-10:00	Discussion: Common Treatment Problems Seen in the Cases Faculty
10:00-12:00	Breakout Session Develop Sequencing of Treatment with Faculty
12:00-1:00	Lunch
1:00-3:00	Candidates: Present Treatment Sequencing
3:00-5:00	Planning for interim treatment or next session

(30-40 Days Laboratory and pretreatment diagnosis are completed)

Phase II Surgical and Restorative Preparation

Day 1

8:00-10:00	Review of pretreatment work up Mentors with individual candidates
10:00-12:00	Discussion of surgical cases
12:00-1:00	Lunch
1:00-4:00	<u>Surgery</u> Pre Prosthetic/Implant/Transitional Restorative Treatment

Day 2

8:00-12:00	Discussion of: surgical outcomes, transitional restorative treatment
------------	--

	in office treatment, mentoring with respect to interim treatment or preparation for the next phase
12:00-1:00	Lunch
1:00-4:00	Review and Discussion continued

(Two months)

Phase III Temporization and Restorative Preparation

Day 1

8:00-10:00	Discussion of Implant Uncovering
10:00-12:00	Lab Exercise for Implant Uncovering
12:00-1:00	Lunch
1:00-4:00	<u>Surgery if Applicable</u> Completion of Restorative Preparation and Temporization

Day 2

8:00-12:00	Discussion of: Surgery, Preparation and Temporization, In office Treatment, Mentoring with respect to interim treatment or preparation for the next phase, Treatment or Preparation for the next phase
12:00-1:00	Lunch
1:00-4:00	Discussions continue...

(Four months)

Phase IV Implant Surgery – Stage II Final Restorative Treatment

Day 1

8:00-12:00	<u>Uncovering Implant and Temporization</u>
12:00-1:00	Lunch
1:00-4:00	<u>Finalize Restorative Treatment Impressions and Jaw Records</u>

Day 2

8:00-12:00	Discussion: Implant Uncovering, Temporization, Review of Restorative Treatment, In Office Treatment Mentoring in respect to preparation for the final phase
12:00-1:00	Lunch
1:00-4:00	Discussion Continued

(30-40 days Cases sent to lab for completion)

Phase V Final Case Presentation and Evaluation

Day 1

8:00-10:00	Review of Laboratory Cases
10:00-12:00	<u>Patient Treatment</u>
12:00-1:00	Lunch
1:00-4:00	<u>Patient Treatment and Documentation</u>

Day 2

8:00-12:00	Case Presentation and Evaluation
12:00-1:00	Lunch
1:00-4:00	Case Presentation and Evaluation
